# Single-Channel: 6N138, 6N139 Dual-Channel: HCPL-2730, HCPL-2731 Low Input Current High Gain Split Darlington Optocouplers

## Features

- Low current - 0.5 mA
- Superior CTR-2000%
- Superior CMR-10 kV/μs
- CTR guaranteed 0-70°C
- U.L. recognized (File # E90700)
- VDE recognized (File # 120915) Ordering option V, e.g., 6N138V
- Dual Channel - HCPL-2730
- HCPL-2731

## Applications

- Digital logic ground isolation
- Telephone ring detector
- EIA-RS-232C line receiver
- High common mode noise line receiver
- μP bus isolation
- Current loop receiver

## Description

The 6N138/9 and HCPL-2730/HCPL-2731 optocouplers consist of an AlGaAs LED optically coupled to a high gain split darlington photodetector.

The split darlington configuration separating the input photodiode and the first stage gain from the output transistor permits lower output saturation voltage and higher speed operation than possible with conventional darlington phototransistor optocoupler. In the dual channel devices, HCPL-2730/HCPL2731, an integrated emitter - base resistor provides superior stability over temperature.

The combination of a very low input current of 0.5 mA and a high current transfer ratio of 2000% makes this family particularly useful for input interface to MOS, CMOS, LSTTL and EIA RS232C, while output compatibility is ensured to CMOS as well as high fan-out TTL requirements. An internal noise shield provides exceptional common mode rejection of 10 kV/μs.

| Input-output insulation leakage current | (Relative humidity = 45%)<br>( $T_A = 25^\circ\text{C}$ , $t = 5$ s)<br>( $V_{I-O} = 3000$ VDC)<br>(Note 8) | $I_{I-O}$ |      |           | 1.0 | $\mu\text{A}$ |
| Withstand insulation test voltage       | (RH $\leq 50\%$ , $T_A = 25^\circ\text{C}$ )<br>(Note 4) ( $t = 1$ min.)                                    | $V_{ISO}$ | 2500 |           |     | $V_{RMS}$     |
| Resistance (input to output)            | (Note 4) ( $V_{I-O} = 500$ VDC)   | $R_{I-O}$ |      | $10^{12}$ |     | $\Omega$      |
| Capacitance (input to output)           | (Note 4, 5) ( $f = 1$ MHz)  | $C_{I-O}$ |      | 0.6       |     | pF            |
| Input-Input Insulation leakage current  | (RH $\leq 45\%$ , $V_{I-I} = 500$ VDC) (Note 6)<br>$t = 5$ s, (HCPL-2730/2731 only)                         | $I_{I-I}$ |      | 0.005     |     | $\mu\text{A}$ |
| Input-Input Resistance                  | ( $V_{I-I} = 500$ VDC) (Note 6)<br>(HCPL-2730/2731 only)  | $R_{I-I}$ |      | $10^{11}$ |     | $\Omega$      |
| Input-Input Capacitance                 | ( $f = 1$ MHz) (Note 6)<br>(HCPL-2730/2731 only)  | $C_{I-I}$ |      | 0.03      |     | pF            |

\*\* All Typical at  $T_A = 25^\circ\text{C}$

**Notes**

1. Current Transfer Ratio is defined as a ratio of output collector current,  $I_O$ , to the forward LED input current,  $I_F$  times 100%.
2. Pin 7 open. (6N138 and 6N139 only)
3. Common mode transient immunity in logic high level is the maximum tolerable (positive)  $dV_{cm}/dt$  on the leading edge of the common mode pulse signal  $V_{CM}$ , to assure that the output will remain in a logic high state (i.e.,  $V_O > 2.0$  V). Common mode transient immunity in logic low level is the maximum tolerable (negative)  $dV_{cm}/dt$  on the trailing edge of the common mode pulse signal,  $V_{CM}$ , to assure that the output will remain in a logic low state (i.e.,  $V_O < 0.8$  V).
4. Device is considered a two terminal device: Pins 1, 2, 3 and 4 are shorted together and Pins 5, 6, 7 and 8 are shorted together.
5. For dual channel devices,  $C_{I-O}$  is measured by shorting pins 1 and 2 or pins 3 and 4 together and pins 5 through 8 shorted together.
6. Measured between pins 1 and 2 shorted together, and pins 3 and 4 shorted together.

**Electrical Characteristics** ( $T_A = 25^\circ\text{C}$  unless otherwise specified)

Current Limiting Resistor Calculations

$$R_1 \text{ (Non-Invert)} = \frac{V_{DD1} - V_{DF} - V_{OL1}}{I_F}$$

$$R_1 \text{ (Invert)} = \frac{V_{DD1} - V_{OH1} - V_{DF}}{I_F}$$

$$R_2 = \frac{V_{DD2} - V_{OLX} (@ I_L - I_2)}{I_L}$$

Where:

 $V_{DD1}$  - Input Supply Voltage $V_{DD2}$  - Output Supply Voltage $V_{DF}$  - Diode Forward Voltage $V_{OL1}$  - Logic "0" Voltage of Driver $V_{OH1}$  - Logic "1" Voltage of Driver $I_F$  - Diode Forward Current $V_{OLX}$  - Saturation Voltage of Output Transistor $I_L$  - Load Current Through Resistor  $R_2$  $I_2$  - Input Current of Output Gate

### Package Dimensions (Through Hole)

### Package Dimensions (Surface Mount)

### Package Dimensions (0.4"Lead Spacing)

### Recommended Pad Layout for Surface Mount Leadform

#### NOTE

All dimensions are in inches (millimeters)

## Ordering Information

| Option | Example Part Number | Description                           |
|--------|---------------------|---------------------------------------|
| S      | 6N138S              | Surface Mount Lead Bend               |
| SD     | 6N138SD             | Surface Mount; Tape and reel          |
| W      | 6N138W              | 0.4" Lead Spacing                     |
| V      | 6N138V              | VDE0884                               |
| TV     | 6N138TV             | VDE0884; 0.4" lead spacing            |
| SV     | 6N138SV             | VDE0884; surface mount                |
| SDV    | 6N138SDV            | VDE0884; surface mount; tape and reel |

## Marking Information

| Definitions |  |
|-------------|--|
| 1           | Fairchild logo   |
| 2           | Device number  |
| 3           | VDE mark (Note: Only appears on parts ordered with VDE option – See order entry table) |
| 4           | Two digit year code, e.g., '03'  |
| 5           | Two digit work week ranging from '01' to '53'  |
| 6           | Assembly package code  |

## Tape Specifications

## Reflow Profile

- Peak reflow temperature: 225C (package surface temperature)
- Time of temperature higher than 183C for 60-150 seconds
- One time soldering reflow is recommended

## TRADEMARKS

The following are registered and unregistered trademarks Fairchild Semiconductor owns or is authorized to use and is not intended to be an exhaustive list of all such trademarks.

## DISCLAIMER

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY, FUNCTION OR DESIGN. FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS, NOR THE RIGHTS OF OTHERS.

## LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION. As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, or (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in significant injury to the user.

2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

## PRODUCT STATUS DEFINITIONS

### Definition of Terms

| Datasheet Identification | Product Status         | Definition  |
|--------------------------|------------------------|---|
| Advance Information      | Formative or In Design | This datasheet contains the design specifications for product development. Specifications may change in any manner without notice.  |
| Preliminary              | First Production       | This datasheet contains preliminary data, and supplementary data will be published at a later date. Fairchild Semiconductor reserves the right to make changes at any time without notice in order to improve design. |
| No Identification Needed | Full Production        | This datasheet contains final specifications. Fairchild Semiconductor reserves the right to make changes at any time without notice in order to improve design.   |
| Obsolete                 | Not In Production      | This datasheet contains specifications on a product that has been discontinued by Fairchild semiconductor. The datasheet is printed for reference information only.   |
